platinum range

Having originated in Italy, created in South Africa, awarded worldwide, welcome to the world of Paradyne and Palazzo.

Both multiple international award winners, not least of which is the Gold Key International Award for "The best bathroom in the world 2003".

In a decade our Baths have made their mark. With their origins inspired by Italian design, craftsmanship rooted in Southern Africa and sales and awards mounting internationally, our brands truly global.

While we cannot make claims to being the biggest, we can lay claim to being the best and most awarded bath brand to ever come out of Africa. "The most beautiful bathroom in the world" award is not an international accolade we take lightly.

What are the products manufactured from, and how are they made?

Using the latest technology, acrylic, sygnite polymers and reconstituted quartz stone, our baths are the paradigm of quality and innovation.

Each product is cast in a mould, and is therefore completely solid and the same colour all the way through. The liquid, called sygnite, has an acrylic resin-based formula, and contains organic fillers giving each product a unique finish. The liquid in the mould is de-gassed, and allowed to cure in a special oven. Once this process is completed, the product is de-moulded and finished by hand. Each finished product is specially sealed to protect it for daily use.

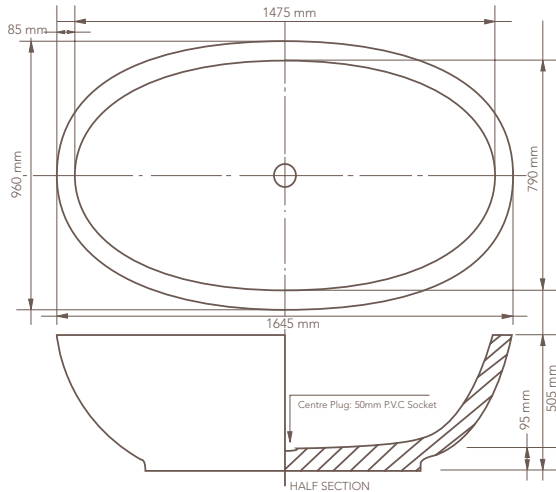

Which colours are available?

Products are generally available in three standard colours: White, Lime White and Sandstone with a variety of finishes. Glazed white has a high gloss finish on the outer and inner. Matt White is a smooth inner and outer with a soft, matt finish. Lime White and Sandstone have smooth inners with rustic outers.

Our factory is also geared to produce baths and basins with metallic high gloss finishes and pop-art colours of red, green, blue etc.
